

StudyCal API (1.0.0)

Download OpenAPI specification: [Download](#)

Complete API test collection for StudyCal.

Base URL: <http://localhost:5000/api>

Auth: After login or register, copy the token from the response and set it as the collection variable 'token'.
All protected routes use Bearer token auth automatically.

Auth

Register

P1.0 — Kelola Authentikasi: Register new student account. Copy the returned token into the collection variable.

Responses

> **201** Register

POST /auth/register

Response samples

201
